

How Johnson Controls Centralized Supply Chain Operations Across 40 Sites

DISCOVERING LEANDNA

Johnson Controls started with a small deployment roadmap, implementing LeanDNA at 4 sites in 2019.

12%

Reduced days of inventory in the first year

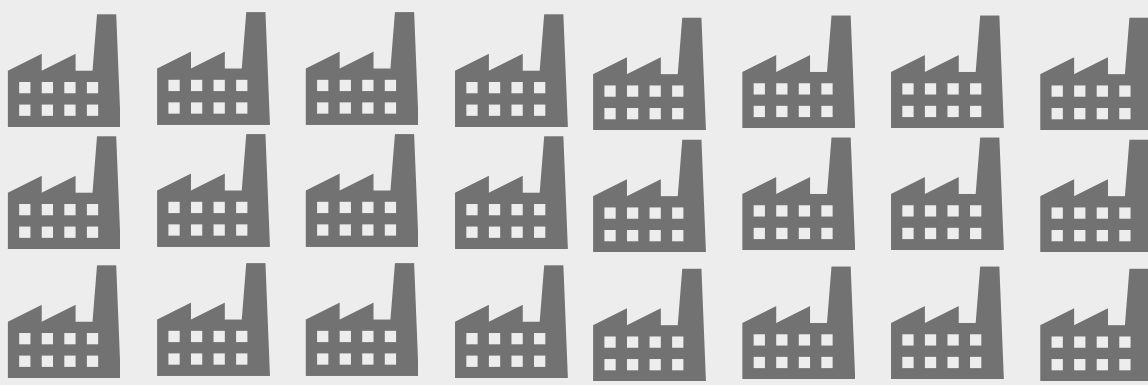

28%

Improved supplier commitment

“The implementation was so well-received by the sites, that we decided to increase and expand.”

Ximena Wilson
Director Global Inventory & Materials Planning

FROM PILOT TO FULL DEPLOYMENT

The small roadmap expanded to 15 sites, and eventually 40 sites had implemented LeanDNA.

CENTRALIZING DATA AND STREAMLINING OPERATIONS

“When you are trying to manage multiple sites, and you have the challenge of multiple ERP systems in your organization. A tool and solution like LeanDNA comes in handy because you have one location to look at all your data.”

Ximena Wilson
Director Global Inventory & Materials Planning

A GAME-CHANGER FOR DAILY OPERATIONS

“At the buyer level, LeanDNA adds a lot of value into daily operations because they can check multiple dashboards and KPI's in just one tool and that saves time for daily operations.”
